Claim 9. (New). A portable outdoor lighting fixture comprising;

base means,

hollow pole means extending vertically from said base means,

a flexible arm connected to said pole means,

a shade assembly connected to said arm,

said shade assembly including a low voltage bulb therein,

said pole means includes a hollow pole connected to said plate,

a tube in telescoped relation to said pole, and

a compression nut on said pole to grip said tube to retain said shade assembly at a selected height,

said base means including a base plate,

at least three legs attached to said plate,

a terminal connector block attached to said plate on the side opposite from said pole means.

wire means connected to said block and to said shade assembly.

said shade assembly includes a switch connected to said wire, and

a low voltage transformer remote from said fixture connected to a source of electrical energy, and a supply wire connected to said transformer and to said connector block to supply low voltage to said fixture.
